

**DIVER**

**HELMET LIGHT**

The Diver Helmet LED light has built-in electronics which automatically compensate umbilical lengths and current. A 24 VDC power source will give optimum results, only for long cable (> 250 meters) it is recommended to use 36 VDC power source. Bruce Systems Helmet LED light is also available with a different connector and locking sleeve on request.

On its standard configuration the light is made in Hard Anodized Aluminium and is equipped with stainless steel bulkhead connector male (MC-BH-2M-SS).

**SPECIFICATION:**

Material	Alluminium (standard) / Stainless Steel 316L
Depth rate	300 msw
Weight	Al 270 gr / SS 316L 625 gr
Power	21 ~ 32 VDC @ 800 mA
Color	Black / Stainless Steel
Lumen	1540 lm
Wavelength	6500 K
Beam angle	120 °
Connector	MCBH-2-M-SS
